

LET US BRING **PROVEN UV** **DISINFECTION** WHEN AND WHERE YOU NEED IT

In today's world, it is critical to be able to protect the places we live, learn, work, and play against harmful pathogens.

Our Flash Tripod M3 has you covered with a UV disinfection solution that has been independently validated and is both cost-effective, and operationally-effective.

Key Features:

- Full-spectrum pulsed Xenon UV light proven to kill up to 99+% of *E. coli*, MRSA, Norovirus, and Coronavirus in 30 minutes
- With 3 S.A.G.E. UV Micro units, provides up to 360° of disinfection coverage, with each Micro unit sanitizing a 10' x 10' area for up to 300 square feet (27 square meters) of coverage
- Optional wheel base for easy mobility between spaces
- Built-in safety sensors to deactivate units if motion is detected
- Custom carry case to transport and store your Flash unit when not in use

HARNESS THE **POWER OF ULTRAVIOLET** TO PROTECT YOUR SPACES

The Flash Tripod M3 is an effective tool to defend against key pathogens* in nearly any environment. The custom case will make it easy to bring the power of UV to the spaces that need it most, including:

- Office Buildings
- Manufacturing Facilities
- Schools & Universities
- Government & Military Facilities
- Healthcare Facilities
- Public Transportation & Aviation
- Emergency Management Vehicles & Buildings
- Athletic Facilities
- Hotels
- Restaurants & Food Service Areas
- Assisted & Senior Living
- And more...
